## DETAILED ACTION

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sawyer US
Patent 6762929.

Regarding claim 1, Sawyer discloses a device comprising:

the electronic panel in one of said first and second positions(element 102,204, 304, 404, 504, 604, Figs 1-20).

at least one of an electronic panel or a panel support being rollable in a rolling direction(element 102,204, 302, 404, 504, 604, Figs 1-20),

the part of the electronic panel or the panel support outside the housing having a substantially linear cross - section in a plane parallel to the rolling direction and a curved cross - section in the direction perpendicular to the rolling direction(column 4, lines 10-20).

Regarding claim 2, Sawyer discloses having enforcement parts along the edges of the electronic panel (element 104,208, 308, 408, 508, 608, Figs 1-20).

Regarding claim 3, Sawyer discloses the part of the electronic panel or the panel support outside the housing having in the direction perpendicular to the rolling direction Application/Control Number: 10/598,747

Art Unit: 2841

a curved cross - section comprising multiple curves(element 102,204, 304, 404, 504, 604, Figs 1-20).

Regarding claim 4, Sawyer discloses the housing having means for curving the electronic panel or a panel support at an exit opening (element 314, Figs 1-20). Regarding claim 5, Sawyer discloses the housing having a curved slit, the slit having a form substantially equal to the curved cross - section in the direction perpendicular to the rolling direction(element 314, Figs 1-20).

Regarding claim 6, Sawyer discloses he housing having a mechanism for forcing the electronic panel or the panel support in the curved state after unrolling the device (element 312, 316 Figs 1-20).

Regarding claim 7, Sawyer discloses having an opening with one side having a form substantially equal to the curved cross - section in the direction perpendicular to the rolling direction, the housing further having a lid having substantially the same form as said side, that by closing the lid forces the electronic panel or the panel support in the desired curvature(element 314,316 Figs 1-20).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAMEON E. LEVI whose telephone number is (571)272-2105. The examiner can normally be reached on Mon.-Thurs. (9:00 - 5:00) IFP, Fridays Telework.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jinhee Lee can be reached on (571) 272-1977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
